

## Properties of Quadrilaterals

<u>Square</u>	<u>Rectangle</u>	<u>Parallelogram</u>	<u>Rhombus</u>	<u>Kite</u>	<u>Trapezoid</u>
<u>Have four equal sides</u>	<u>Have four <math>90^\circ</math> angles</u>	<u>Opposite sides that are parallel and equal.</u>	<u>Have 4 equal sides.</u>	<u>Have two pairs of sides with equal length.</u>	<u>Have one pair of parallel sides.</u>
<u>Have four <math>90^\circ</math> angles</u>	<u>Opposite sides are parallel and equal</u>	<u>Opposite angles are equal.</u>	<u>Opposite sides that are parallel.</u>	<u>Each pair shares a common vertex.</u>	<u>All angles add to <math>360^\circ</math></u>
<u>All angles add to <math>360^\circ</math></u>	<u>All angles add to <math>360^\circ</math></u>	<u>All angles add to <math>360^\circ</math></u>	<u>Opposite angles are equal.</u>	<u>All angles add to <math>360^\circ</math></u>	
<u>All angles add to <math>360^\circ</math></u>			<u>All angles add to <math>360^\circ</math></u>
